Hi Bob,

I'm adding you to the NSPS OOOO call agenda for next week's call!

Thanks,

Alex

Subject: Another OOOO / OOOa Question

Alexis,

I don't have the distribution list for the OOOO / OOOOa work group; so can I impose on you to send this to the group for input?

A fractionation facility for natural gas that is replacing their existing flare with a new flare and all of the piping between the flare and the emission units. The emission units that vent to the flare have fugitive equipment components that are subject to NSPS OOOO. Am interested in knowing whether all of the new piping, valves, connections, etc. that will be installed from the emission units to the new flare would count as modifications of the emission units thus triggering NSPS OOOOa or if they would be a part of the flare and thus not subject to OOOOa?

Thanks,

R. L. (Bob) Cheever
